Are you a highly motivated young professional, with broad experience in state-of-the-art web design and development? Do you have the mindset to tackle online marketing, IT, and operational system tasks independently?

If so, we are looking for a long-term Thai or Foreign Website Developer, who can combine design and programming to promote our amazing properties in the digital environment. You will work with the resort managers in updating content, visual design, and technical implementation; as well as taking an active role communicating our product and values via our websites to our future customers.

Our Jungle Group includes 2 Eco- and Sustainability- focused resorts near Khao Sok National Park with a total of 42 rooms, and a nature education camp for Thai and Foreign students (our way of giving back to the community and promoting conservation).

The work arrangement comprises a monthly retainer of 20–30 hours. Additional benefits include free full board stays at our properties. The work can be conducted remotely, with 2-3 meetings per year at our property to allow for in-person communication about concepts and strategies, and direct experience of the product.

Required Skill Set

- Proficient understanding of advanced JavaScript libraries e.g. **ReactJS**
- Good understanding of web markup languages, including **HTML5, CSS3**
- Ability to understand individual custom build websites scripted in **PHP**
- Proficiency of code versioning and content management tools e.g., **GIT, WordPress, Cosmic**
- Good understanding of general **SEO principles, Google Analytics, and Google AdWords.**
- Ability to communicate both in written and spoken English, Thai language skills are a plus.
- Content Creation & Design Skills with knowledge of the **Adobe Creative Suite** (PS,IL,ID,PP)

Responsibilities

- Content, structural, and SEO updates on existing resort websites - [OJC/OJH/JLC](#)
- Finalize existing React Build (currently 60% completed) – <https://ojcgatsby.gatsbyjs.io/>
- Monitor and consult on Search Engine Ranking & General Website Health
- As needed trouble shooting in case of system failure or arising issues
- Transition of existing websites into the React Framework
- Consult on design and content adjustments for the new website builds
- Support in the general digitalisation and implementation of IT-Systems and Software (e.g., POS, PMS, Xero, Google Suit etc.)

Compensation depends on experience, for inquiries or additional questions, please contact us via manager@khaosokecoresort.com.
